# TelChem Power-Tab Tablet Chlorination Systems

Model 3075SP

## Power – Tab Chlorinators are:

- Safe, easy to use systems
- Accurate chlorination up to 180kgs /day
- Reliable with minimal maintenance

## Features include:

- Weatherproof electrical enclosure
- 240 volt pumps
- Schedule 80 George Fischer plumbing for strength & reliability
- No Dangerous Goods License required

## Applications:

- Potable water
- Commercial Swimming Pools
- Wash down Stations
- Industrial processes
- Odour control
- Iron removal
- Waste Water

Model 3075SP chlorination unit

#### How the Accu-Tab® System Works

When the irrigation pump begins to run, a small side stream of water flows through the chlorinator. The water contacts the *Accu-Tab* tablets in the chlorinator and erodes a controlled, predictable amount of chlorine. Once the water is chlorinated, it flows back into the main water line, and is distributed through the network. The chlorinator automatically stops when the water flow is shut off. A control valve at the inlet allows precise chlorine residual control: high flow rates for 'shock' treatments or lower flow rates for maintenance chlorination.

### Accu-Tab® Chlorinators and SI Tablets

A wide range of *Accu-Tab* chlorinators provide the solution to your chlorination needs.

#### Simple & Easy.....

- The tablets are simple to load into the erosion feeder & easy to handle
- The erosion feeder is easy & quick to install
- No moving parts in the erosion feeder to maintain
- No small orifices to clog
